SKILLS

PROGRAMMING LANGUAGES	C++, C, Python
LIBRARIES/FRAMEWORKS	Javascript, Reactjs, HTML5, Bootstrap, CSS, Sass
TOOLS / PLATFORMS	Web Development, Problem Solving skills, Ai tools Familiarity(Be10X Certification)

PROJECTS / OPEN-SOURCE

FOODIESHUB | LINK   Reactjs, HTML5, Sass, Javascript

"A dynamic web platform I developed using ReactJS, JavaScript, HTML5, and SASS, designed to empower cooking enthusiasts. Users can easily search and access a diverse range of recipes, enabling them to cook their favorite dishes with confidence. Additionally, the platform offers expert tips and guidance from top chefs, making it a one-stop destination for culinary inspiration and problem-solving in the kitchen."

GRADTRACKER | LINK   HTML5, Javascript library, css, Bootstrap

"An informative web application I developed using HTML5, CSS, JavaScript library, and Bootstrap Carousel, dedicated to helping fellow students of my navigate their career paths. This project offers insights into recruiting companies, showcases success stories of students securing high-paying positions in core industries, and outlines the overall placement procedure, empowering aspiring graduates with valuable career guidance."

DRUMKIT | LINK   Javascript, HTML5, CSS

"DrumKit - A fun and interactive web application I developed, showcasing my proficiency in HTML, CSS, and JavaScript. DrumKit allows users to unleash their inner musician by clicking on buttons, each corresponding to a different musical instrument sound. Additionally, it enhances user experience by responding to keyboard input, producing musical sounds with specified alphabet keys, offering an engaging and creative way to explore the world of digital music."
